Agenda

- Connected Courts Approach: Multi-site configuration with Niagara Framework
- Niagara Cloud Applied including Video Demo
- Broader Niagara Strategy with the Ministry of Justice NZ

hello

Connected Courts
Approach:
Multi-site configuration
with Niagara Framework

01

Large Size

Christchurch Justice & Emergency Services Precinct

02

Medium Size

Whangarei Dual Courts

03

Small Size

Morrinsville District Court

Solution Brief

- Securely connect the various BMS's back to a centralized platform for monitoring and control by National Ministry of Justice (MoJ) users.
- Manage BMS users nationally across disparate networks and domains.
- Remote access for site based approved Staff/Contractors without central system access.
- Sanitise and standard data across the portfolio.
- Promote enhancements with tangible benefits:
 - Understand the state and availability of Courts throughout the portfolio.
 - Ease of extracting and/or receiving data (automated reports).
 - Drive energy efficiency and sustainability.

Whangarei Dual Courts

North Shore District Court

Rotorua District Court

Manukau District Court

Porirua District Court

Hamilton Dual Courts

Queenstown District Court

Tauranga Dual Courts

Levin District Court

National Overarching Supervisor (NOS)

niagara⁴
Honeywell

Located in Christchurch Justice & Emergency Services Precinct

Central MoJ Network User

- Point and History data available at the NOS
- Utilise System Database Indexing for User Experience
- Access to Edge Sites via Niagara Virtuals
- Niagara based SSO implemented

Authorized Remote User

- Remote access via Niagara Cloud
- No different to local access
- Easily manage Backups

Secure Network Connectivity

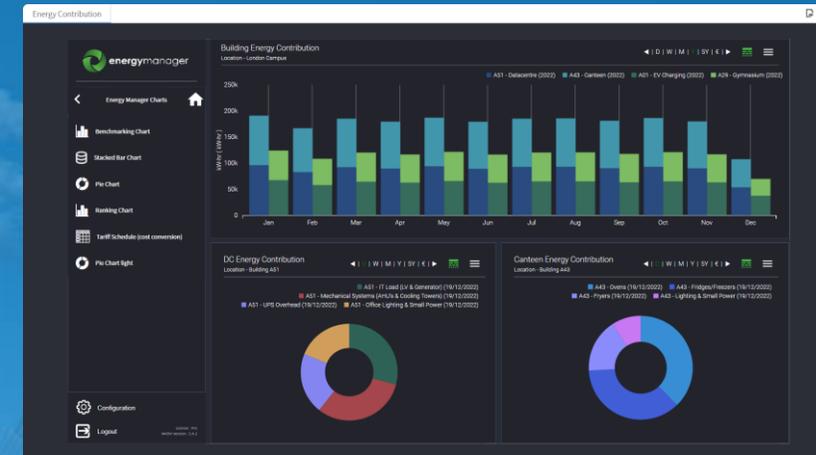

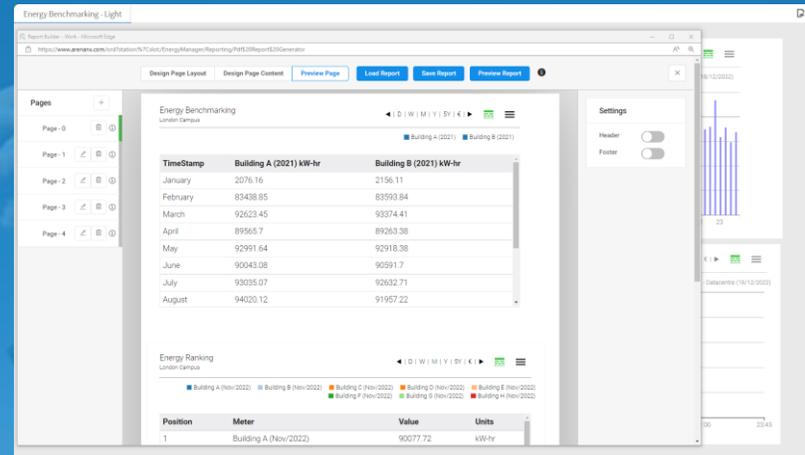

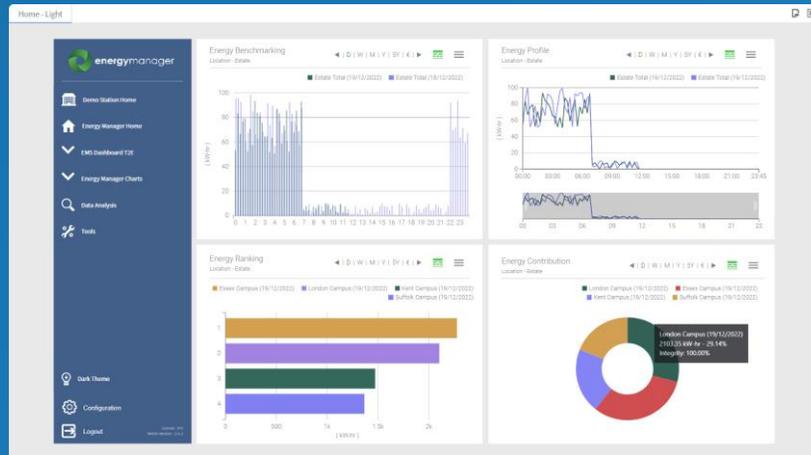

- IP Sec VPN Tunnel – Hub & Spoke Format
- Translated IPs
- ACL applied in the VPN
- Secure protocols utilized
- Active AV (HAES)
- Hybrid ZTNA (future*)

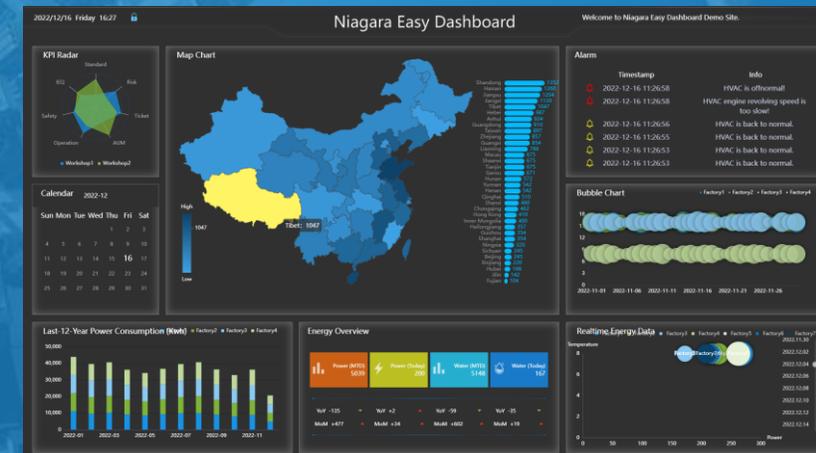

Local User

- User authenticate to NOS using Niagara based SSO

Niagara 4 Energy Manager

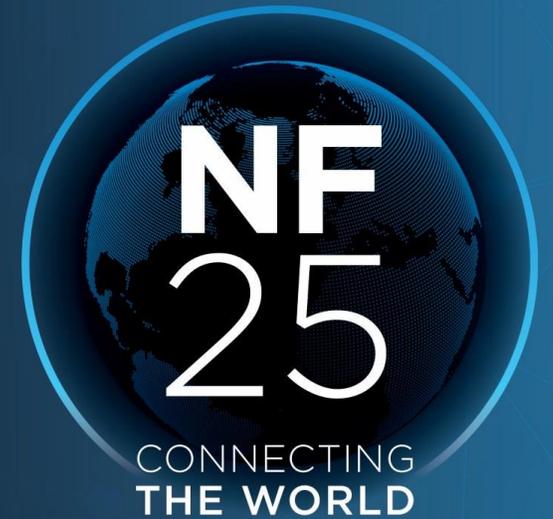

Niagara Easy Dashboards

Niagara Cloud Remote & Recovery Applied

*Including Live Demo for Niagara
Cloud Remote Access*

niagara⁴ Tagging Support Timeline

Figure 1. Introduced in Niagara 4.0, Niagara entity query language (NEQL) made it possible to search for tags within Niagara stations. With every subsequent release, the Niagara development team has made tagging easier to comprehend, deploy and use.

Consolidated Tagging Benefit Examples...

- We need to perform maintenance on B02-MSSB-L13-01
- What is going to be affected?
- What areas are going to be affected?

Consolidated Tagging Benefit Examples...

- The electrical supply to B02-SCHWP-L13-01 & 02 (Building 2 Secondary Pumps) have failed
- Query what equipment have Cooling Coils in Building 2 - VBIS tag "ME-Co-Co-Ch"
- Query what rooms are fed by zones fed by that equipment
